Title: Same Actions, Different Endings: Outcome Severity Shifts How AI Models Apply Reason's Culpability Decision Tree to Airline Flight Crews

Author: James Le Cuirot

Affiliation: CitadelAero, Jersey, Channel Islands

Corresponding author: James Le Cuirot, james@citadelaero.com, ORCID 0009-0009-6014-1298

About the author: Commercial pilot (Senior First Officer), aviation flight safety officer, and aviation safety and compliance consultant specialising in human factors; MSc in Human Factors in Aviation.

Declarations

Declaration of competing interest. The author's company, CitadelAero, develops AI tools for aviation safety and compliance teams. No CitadelAero product was tested. The results were to be published whichever way they came out, and the claims are limited to the models and conditions tested.

Funding. This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors. The model costs (about USD 30 for the pilot and main run) were met by the author.

CRediT authorship contribution statement. James Le Cuirot: Conceptualization, Methodology, Validation (checking every case against its source report), Writing – original draft (with AI assistance, as declared in the manuscript), Writing – review & editing, Funding acquisition.

Pre-registration and preprint. The study was registered on OSF on 1 October 2026 (`https://osf.io/s8q24`). The materials, data and code are on OSF (`https://osf.io/dhf38`, DOI 10.17605/OSF.IO/DHF38). An earlier version of the manuscript was posted as a preprint (version 1, 2 October 2026).

Acknowledgements. NASA's Aviation Safety Reporting System and the reporters whose accounts made this study possible. NASA does not verify or validate ASRS reports.
